

Chapter 1

RST Bugs

1.1 Subexamples

(1a) this dog

(1b) *these dog

It would be better if this could be rendered along the following lines:

(1) a. this dog
b. *these dog

However, the following cross-references are fine as they stand: examples (1) contains (1a) and (1b).

1.2 Gloss Directive

In the PDF output, the example number should be lined up with the top of the table, rather than the centre. (Also, seems to be incorrectly coming out as '(2a)' rather than just '(2)'.)

(2a)

un	cuadro	hermos-o
INDEF.SG.MASC	picture	beautiful-SG.MASC

'a beautiful picture'

In the HTML output, there is too much interline space when the gloss is embedded inside an exercise:

1. ● Augment (8) so that it will correctly describe the following Spanish noun phrases:

(3a)

un	cuadro	hermos-o
INDEF.SG.MASC	picture	beautiful-SG.MASC

'a beautiful picture'

1.3 AVMs

The following AVM doesn't get parsed properly. (Not too serious --- we could drop this example if fixing it is tricky.)

(4a) [A = (1) [] [] [B = (2) [] [] [C -> (1)] [D -> (2)] [A = (1) [] [] [B = (2) [] [] [C -> (1)] [D -> (2)]

1.4 Pylisting

1. Clicking on a tag hyperlink in running text takes you to the first page of the PDF file
2. Tag ② now appears in doctest block, but test/doctest_driver.py will need to be tweaked

Listing 1 Pylisting

```
>>> a = 1      ①
>>> a
1              ②
```
